German Functional Medicine

- Originated and developed by Dr. med. Helmut Schimmel of Germany.
- Diet, nutrition and environmental toxins play an important role in German Functional Medicine.
- Analyzes how human biological system interacts functionally with the environment over time.

German Biological Medicine

- A ***bio-energetic*** practice that integrates ***Western basic science*** along with ***European homeopathy, European herbal medicine, Traditional Chinese Medicine*** principles, ***Biophysical Information Therapy*** and ***Terrain/Milieu*** based medicine.

origin and treatment of
chronic diseases.*

VEGATEST Method

- Developed and created by Dr. Helmut Schimmel
- Based on the work of Reinhardt Voll, MD
- Measuring changes of the electrical resistance of the skin on acupuncture point to determine whether a substance is beneficial or detrimental to the body

VEGA

VEGA Grieshaber Kg

VEGA develops and manufactures sensors for the measurement of **level**, **point level** and **pressure** as well as equipment and software for integration into process control systems.

Measurement technology for highest reliability in every application

Milieu = Terrain

“Le microbe n’est rien, le terrain est tout.”

“The microbe is nothing, the terrain is everything”

Claude Bernard (Physiologist 1813-1878)
(Louis Pasteur on his deathbed).

Internal Milieu

- Biological Terrain
- Biological Matrix
- Mesenchyme
- Connective Tissue
- Interstitial Tissue

The Mesenchyme

- Houses the lymphatic system, blood vessels, nerve endings and more.
- Mediates everything in between the cells.
- It is the gate-keeper of nutrients and waste exchange for cells.

The Mesenchyme

- When toxins start to build up in our biological matrix, numbers of health problems will occur. The severity of the disease is based on how high is our toxic load.
- Our cells will not be able to absorb nutrients nor they can discharge waste.

Milieu: The Biological Matrix

- Vital nutrients such as – oxygen, vitamins, minerals, etc.– reach the cell by passing through this matrix. Cellular detoxification, communication and regeneration is dependent upon the health and integrity of the bioregulatory matrix.

-BRMI

Biological Index

- Measures the state of the connective tissue to determine the degree of toxicity of the biological matrix
- As toxicity builds up, the mesenchyme becomes blocked and unable to transfer vital nutrients to the cells.

Biological Index

- Developed by Dr. Helmut Schimmel
- Scale: 1-21
- Mesenchyme ampoules, in specific potencies, are used to evaluate the condition of the body's connective tissue.

German Biological Medicine

- ***Not suppressive = Reaction*** is likely to occur (mild or strong depends on stage of illness)
- Stage of illness can be determined through: **Biological Index (VEGA)**, Degree of Intoxication (VEGA), Hans-Reckeweg six phases (or Shan Han Lun), **Milieu/Terrain Assessment**, Darkfield Microscopy, Eight Phases of Health (Kimchi Moyer) etc.

Prof. Dr. Guenther Enderlein

- The cell is ***not*** the smallest living unit. The ***protit (or the colloid)*** is.
- The blood is ***not*** sterile, but rather contains microorganisms that are capable of ***morphing upward*** causing illness ***given the proper milieu.***

Bacteria Cyclogeny

- The non pathogenic Protit is capable of morphing ***upward*** and becomes ***parasitic*** to the body.
- The pathogenic form can ***downwardly*** develop into ***less pathogenic*** form through a copulation process with a lower non pathogenic form.
- Both upward and downward morphing processes are dependent on the body's ***milieu or pH.***

The Endobiont & pH

- All chronic diseases are based on the ***upward development*** of the Endobiont. According to Enderlein, there is only one disease: ***Endobiosis***.
- The ***higher valence*** or pathogenic forms of the Endobiont disturbs the ***regulatory ability*** of the body.
- Endobiosis is viewed as a ***permanent hyperacidity*** or a reduction of alkalinity, which ***disrupts the biological regulation*** of our human organism.

Milieu = Terrain

Hyperacidification is the greatest single cause of most disease processes. If not excreted out by the body, excess acids will be stored in the ***connective tissue***. This daily process is not the cause, it ***is the chronic degenerative disease***.

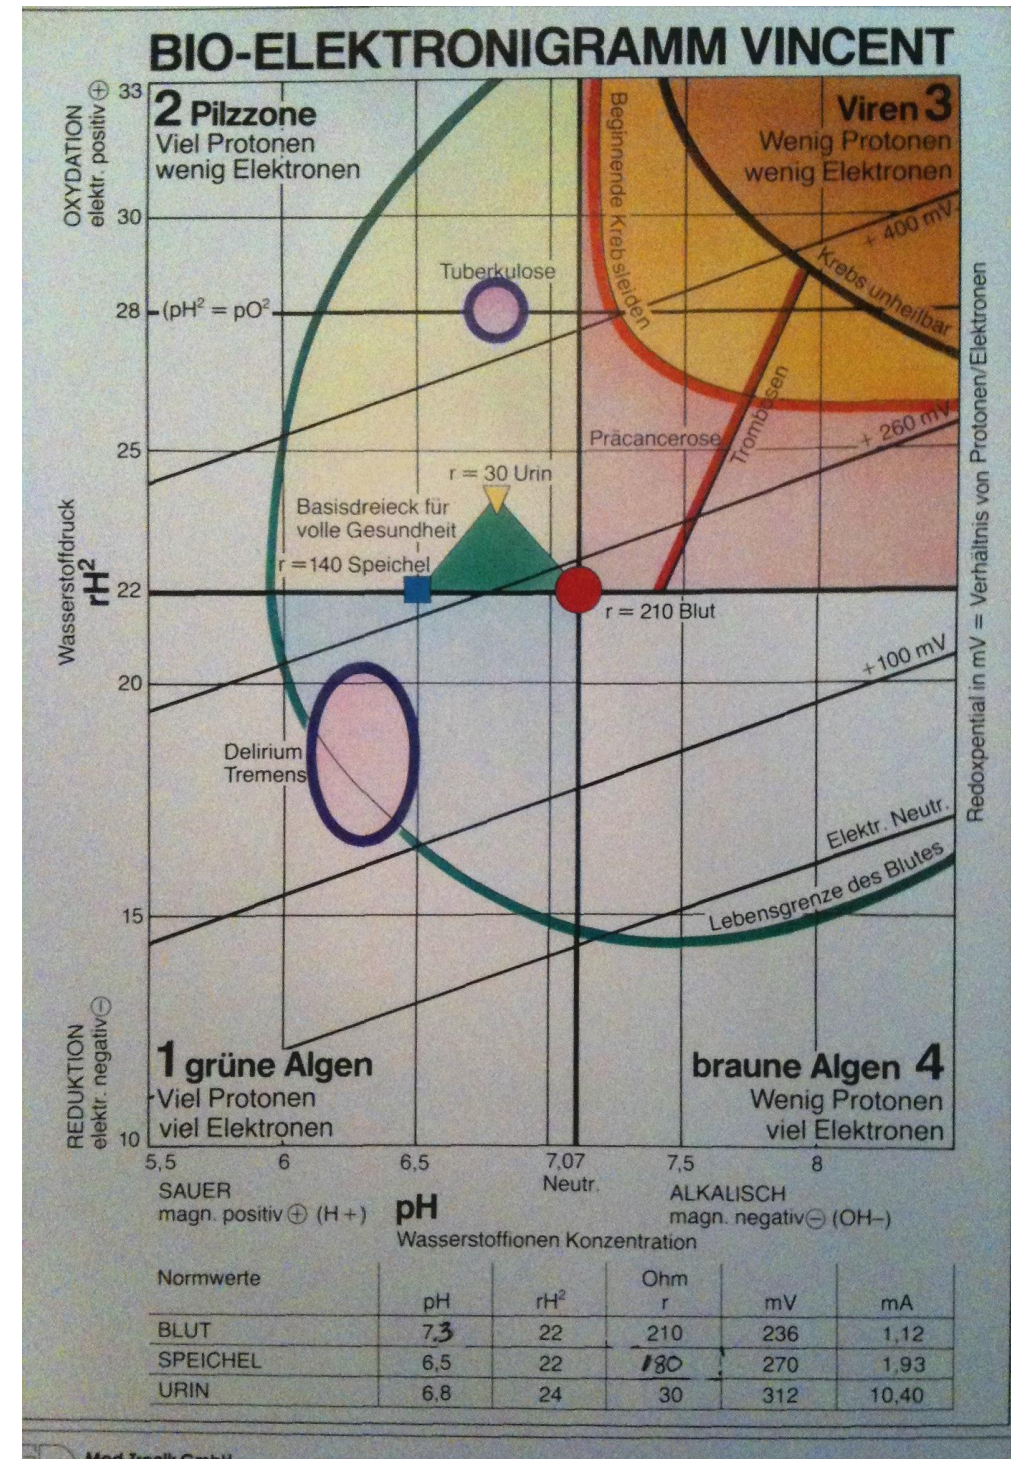

Regulation

- We are only as *healthy* as our *ability to regulate*.
- The ability to regulate is influenced by the *milieu*.
- All remedies *work better* in a *correct* milieu.

Healing Prerequisites

- Besides other factors such as the psyche, restoring normal rhythm of the body etc, true correction of all chronic disease involves:
 - restoring the ***regulation of cell metabolism***
 - restoring the integrity of the ***mesenchyme (matrix)*** by re-establishing normal acid/alkaline levels

What if...

- ...We can converse with the intelligence of the organism?
-We had a way to collaborate with the body and let it tell us what it wants and needs and how best to repair itself?

Resopathy™ defined

- Resopathy™ is a health modality using resonance and advanced biofeedback technologies to gather biological data by measuring the body's natural electrical field.

Resopathy™:

- Based on point conductivity measurement
- A binary (YES/NO) system using both resonance and galvanic skin response (GSR) as a feedback mechanism to solicit information from living organisms.

Resonance

A resonance occurs when two or more substances have similar or the same frequency.

Resopathy™: Solving the Puzzle

- Where is it? (What organs?)
- What's going on? (What toxins?)
- **How bad is the situation ? (What are the Biological Indices?)**
- What are the key remedies?

Decoding the Biological Matrix

- Thanks to the work of Dr. Helmut Schimmel, the biological matrix can be scientifically measured to determine how toxic is the interstitial tissue of a living organism.
- Resopathy Institute continues Schimmel's research in all its case studies.

Thank you for your time!
