Issue 32 BRMI E-Journal

- *COVID-19 Inoculations Update: Their Adverse Effects on Immunity, Organs, and Tissues* by James Odell, OMD, ND, L.Ac
- *Rauwolfia serpentina (Indian Snake Root)* by James Odell, OMD, ND, L.Ac.
- *The Role of Inflammation in Injection Site Sarcomas* by Dr. Marlene Siegel
- *Spring is Here, Allergies Anyone?* By Kris White, Certified Classical Homeopath
- *The Power of T.E.A.R.*, Ian Kennedy, The True Wellness Center
- *Biography: Florence Nightingale* by James Odell, OMD, ND, L.Ac
- *Editorial: Mainstream Media Gaslighting Increasing Heart Problems and Blood Clots* by James Odell, OMD, ND, L.Ac.
- *Video Recommendations: Planet Lockdown: A Documentary, co-produced by Jim Grapek | Terrain the Film (2022)*
- *Podcast: Perspectives on the Latest Current Events Surrounding Covid Inoculations and World Events* with Dr. Larry Palevsky
- *Book Reviews: Bioresonance Therapist Handbook* by Dr. Marguerite Lane ND | *Geoengineered Transhumanism: How the Environment Has Been Weaponized by Chemicals, Electromagnetism & Nanotechnology for Synthetic Biology* by Elana Freeland

Dear Friend,

Welcome to our 32nd BRMI E-Journal.

The most exciting news is that BRMI is no longer under the fiscal sponsorship of the Marion Institute (MI).

[Subscribe](#)[Past Issues](#)[Translate ▼](#)

Donors can deduct contributions they make under IRC Section 170. With your help, BRMI will continue to build an extensive website database, post our podcasts (The Science of Self-Healing), put on conferences and workshops, foster research projects, and bring important information to the public, free of charge. This effort is not possible without your generosity. We sincerely thank all our viewers for their continued support, comments, and article submissions, and for liking us on our social media, weekly podcasts, and YouTube channel. We ask that you please introduce BRMI to at least two or more friends and have them sign up for this E-journal and our podcasts. [Here](#) is our link to donate if you are able and would like to support our work.

May is International Nurse Month and May 12 (Florence Nightingale's birthday) is International Nurse Day. BRMI joins the international community in recognizing the admirable and invaluable contributions nurses make in the communities they serve in nursing our world back to health. According to a 2021 Gallup poll, for the last twenty years nursing has been rated as the most trusted profession for having high honesty and ethics.

Undoubtedly, 2020 to the present has been an incredibly difficult period for individual nurses and the nursing profession. Many suffered greatly (and still do) while playing a critical role in the colossal response and recovery efforts around the COVID-19 politics. The draconian politics of policies implemented over the last two years have exacerbated a long-standing nursing shortage and highlighted the extreme gaps in healthcare philosophy. In the United States, it is projected that 1.1 million nurses are needed to replace retiring nurses by 2022. Globally, the need is closer to 13 million. The long-term repercussions and consequences for the profession, the entire health care delivery system, and ultimately, the health of the world is potentially dire. Shortages have continued to increase as thousands of nurses have quit their jobs due to "vaccine" mandates of unlicensed experimental biological agents. Nurses also firsthand witnessed patients being prescribed dangerous, deadly drugs (such as Remdesivir) when safer more effective alternatives were available. Many nurses have become ill due to the mental and emotional stress of being short-staffed, overworked, and performing a job that conflicts with their values. Thus, scores of nurses have quit their job to preserve their personal integrity and keep their vow to first do no harm. In short, they did not want to participate in certain hospital policies and medical practices they perceived to be harmful to others and themselves.

We at the Bioregulatory Medicine Institute are all indebted to those nurses who stood against the political tyranny and injustices that permeate our medical community. We will continue to acknowledge and honor your courage and commitment. Nurses hold great political power and if more would push back against vaccine mandates and useless PCR testing, these policies would immediately cease. Public trust in the agencies behind the COVID booster push has suffered massively from continually making recommendations outside data and sound science. The FDA's latest move to push 4th and 5th boosters may be the final straw for a medical community already up in arms.

In keeping with the nursing theme, we have written and posted a biography of [Florence Nightingale in our Pioneers of Bioregulatory Medicine section](#). Florence is considered a founder of holistic and environmental nursing. She was a passionate, innovative, and caring nurse practitioner as well as a prolific writer. In addition to writing over 150 books, pamphlets, and reports on health-related issues, she dedicated her life to making hospitals more hygienic, safe, and compassionate. She stood up against the deplorable hospital conditions and autocratic, barbaric medical doctors of that time. During the Victorian era, there was no formal system of medical training. There were only a handful of hospitals that even existed and physicians of the day, being male, looked down on women in medicine. While considered a prestigious profession today, nurses in the Victorian era were badly treated as handmaidens of physicians who were expected to carry out orders without question. Through her compassionate, holistic-oriented patient care, Florence won doctors and government officials over and elevated nursing to an honorable and noble position. She fought back against the deplorable unsanitary hospital conditions and harmful policies.

Because BRMI is a non-commercial, non-profit institute, this empowers us to present uncensored, open forum information and referenced commentaries, and in turn, enlighten our viewers to more than one

preventive and therapeutic bioregulatory health. In our news forum, we continue to strive to be a trusted and informed source of factual science-based information for our readers. If there is newsworthy information relevant to the science of self-healing that you would like to share, please [contact me](#).

We are planning another [BRMI conference/workshop](#) for October 14th to 16th, 2022 to be held at the beautiful Sonesta Suites, Scottsdale, AZ. (We will kick it off with a reception on the 13th.) The title is Clinical Skills for Challenging Times. Our presenters, including myself, currently are (in alphabetical order): Dr. Gerry Curatola; Sargent Goodchild; Ian Kennedy; Kelly Kennedy LMT; Moira LaBianco; Dr. Robert Milisen; Dr. Ralph Oettmeier; Dr. Christine Shaffner; Dr. Sharon Stills; Dr. Dickson Thom, with more to announce. Please save the date in your calendar and visit our website for more details. We look forward to seeing you there!

We are also excited to announce a certification in Sound Healing offered by our advisor, Moira Lo Bianco. [Here](#) is a link for more information. We look forward to offering more certifications in the future through collaboration with other bioregulatory practitioners.

Please stay tuned to the ongoing biweekly BRMI podcasts hosted by Dr. Sharon Stills, NMD. Dr. Stills has now completed more than 79 exciting and informative podcast interviews. These are all archived on our website. Our featured episode for this E-journal is with Dr. Larry Palevsky.

This E-Journal features the following articles, highlights, and recommendations:

- [COVID-19 Inoculations Update: Their Adverse Effects on Immunity, Organs, and Tissues](#) by James Odell, OMD, ND, L.Ac
- [Rauwolfia serpentina \(Indian Snake Root\)](#) by James Odell, OMD, ND, L.Ac.
- [The Role of Inflammation in Injection Site Sarcomas](#) by Dr. Marlene Siegel
- [Spring is Here, Allergies Anyone?](#) By Kristina White, Certified Classical Homeopath
- [The Power of T.E.A.R.](#) Ian Kennedy, The True Wellness Center
- **Biography:** [Florence Nightingale](#) by James Odell, OMD, ND, L.Ac
- **Video Recommendations:** [Planet Lockdown: A Documentary](#), co-produced by Jim Grapek | [Terrain the Film](#) (2022)
- **Book Reviews:** Bioresonance Therapist Handbook by Dr. Marguerite Lane ND | Geoengineered Transhumanism: How the Environment Has Been Weaponized by Chemicals, Electromagnetism & Nanotechnology for Synthetic Biology by Elana Freeland
- **Podcast:** [Perspectives on the Latest Current Events Surrounding Covid Inoculations and World Events](#) with Dr. Larry Palevsky
- **Editorial:** [Mainstream Media Gaslighting Increasing Heart Problems and Blood Clots](#) by James Odell, OMD, ND, L.Ac.

If you have not signed up to receive our free e-Journal, we invite you to do so. We hope you benefit from our varied resources. Comments and submissions to our e-Journal are always welcome and appreciated.

We maintain an active YouTube channel, [Facebook](#) page, [LinkedIn](#), [Instagram](#), and [GAB](#) and post evidence-based articles and news events daily. To make it easier, we have also added a [Linktree](#). Feel free to interact with us via social media - or contact me directly at jpmmodell@brmi.online.

We thank you for your interest in Bioregulatory Medicine.

James Odell, ND, OMD, L.Ac.
BRMI Executive/Medical Director

COVID-19 Inoculations Update: Their Adverse Effects on Immunity, Organs, and Tissues

James Odell, OMD, ND, L.Ac.

Many claims are being made about COVID-19 inoculations, (misnamed “vaccines”) and what they do and do not do. The problem is that measurements are constantly being manipulated and misrepresented.

[Read more>>](#)

Rauwolfia serpentina (Indian Snake Root)

James Odell, OMD, ND, L.Ac.

It has been historically observed that certain snakes are repelled by the scent of this plant which has long been used as an antidote for cobra, krait, and viper bites. Thus, its name is “snakeroot”.

Spring is Here, Allergies Anyone?

Kristina White; Educator, Certified Classical Homeopath, CCH

As spring comes along with sunny and rainy days, budding plants, growing grass, mold and dust, it also brings for many of us the beginning of allergies. One of my favorite times of the year is spring and getting out and enjoying the season is a must for me and I have had allergies since very young!

**BIOGRAPHY:
Florence Nightengale Born May 12, 1820**

[Subscribe](#)[Past Issues](#)[Translate ▼](#)

Known as “The Lady with the Lamp,” and considered a founder of modern nursing and environmental nursing theory, Florence Nightingale was a passionate, innovative, and caring nurse practitioner and prolific writer. In addition to writing over 150 books, pamphlets, and reports on health-related issues, she is also credited with creating one of the first versions of the pie chart. However, she is mostly known for making hospitals more hygienic and compassionate.

BOOK REVIEWS

Bioresonance Therapist Handbook by Dr. Marguerite Lane ND is the first easily understandable handbook for therapists that has just been released. Not many books on this subject get down to the nuts and bolts of how to do the “magic” of bioresonance. The goal of the book is to bring the BioResonance therapist to a high level of expertise quickly so that more people can be helped.

Geoengineered Transhumanism is the third book in Elana Freeland's trilogy on geoengineering. It completes the picture of what geoengineering has been from its very inception decades ago: to control the ionosphere with phased array heater blasts so as to maintain an ionized atmosphere in which chemicals, nanotechnology, and synbio synergies are dispersed in the name of “climate change.”

VIDEO RECOMMENDATIONS

Co-produced by Jim Grapek, who has joined the BRMI tribe in editing some of our recent videos, this film exposes the politics and negative consequences of the lockdown in response to COVID.

Featuring Dr Andrew Kaufman, Dr Thomas Cowan, and Dr Stefan Lanka's work this film endeavors to putting an end to the Germ Theory of Disease. Obviously this is supported in bioregulatory medicine.

FEATURED PODCAST

The Science of Self-Healing Hosted by Dr. Sharon Stills With Dr. Larry Palevsky

One Doctor's Truth - Perspectives on the Latest Current Events Surrounding Covid Inoculations and World Events| Dr. Larry Palevsky

Dr. Sharon Stills interviews Dr. Palevsky on the current events of the world, from a perspective not shared on mainstream media. Why is the "jab" being pushed so heavily for a virus that carries a 99.9% survival rate?

Check out the other amazing podcasts!

EDITORIAL

Mainstream Media Gaslighting Increasing Heart Problems and Blood Clots

Extreme heat, shoveling snow in the cold, sexual activity, binge-watching TV, exercise, and even skipping breakfast, is now being rebranded in the media as risks for heart attacks and blood clots. Anything and everything seem to be the cause of the increase in heart attacks, blood clots, and strokes EXCEPT for one potential cause, that seems largely absent from the MSM news - the covid inoculations.

Not only has MSM, who is funded largely by the pharmaceutical industry, tried to shift the blame for the increased incidence of heart attacks and circulatory problems on everything imaginable except the COVID "vaccine", but has even aimed at normalizing heart disease and strokes in children and young athletic adults.

The following are a few of the many headlines to surface in the last year:

- Skipping breakfast can increase your risk of having a heart attack
- Death during sex isn't just something that happens to middle-aged men, new study finds
- Harsh winter can increase heart-related complications: Experts warn in new study
- Extreme heat events jeopardize cardiovascular health, experts warn
- Why Shoveling Snow Can Trigger a Heart Attack
- Energy bill price rise may cause heart attacks and strokes, says TV GP
- Binge watching TV linked to a higher risk of Blood Clots
- Physical activity may increase heart attack risk, study suggests
- Climate Change May Increase Heart Attack Risk
- Watching sporting events can lead to heart trouble
- Yes, even runners and triathletes get heart attacks
- Heart attack risks greater for athletes competing in endurance sports
- Doctor's Reminder: Now nobody is too young for a heart attack
- Kids have strokes too
- Infection may increase the risk of stroke in children

Canadian Bus Announcements

It appears the intention of MSM is not to report the known risk of COVID inoculation and heart and circulatory disease, but instead to obfuscate information and normalize its rising occurrence. However, numerous scientific studies have shown that large-scale COVID-19 “vaccination” using mRNA technology is a real risk of vaccine-associated myocarditis (VAM). Recently, a population-based cohort study published in JAMA of 23.1 million individuals aged ≥ 12 years, from four Nordic countries showed a significant risk of SARS-CoV-2 “vaccination” and myocarditis.¹

Dozens of other studies have also demonstrated an increased incidence of myocarditis and pericarditis after vaccination for COVID-19 as well.^{2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35}

The risk of myocarditis and pericarditis after receiving mRNA-based COVID-19 vaccines has been clearly shown to be increased across multiple age and sex strata and was highest after the second shot in adolescent males and young men.

Undoubtedly, there is a link between COVID-19 inoculations and myocarditis, particularly in athletes, where cardiac complications are of particular concern. As of December 16, one news outlet listed 331 athletes who have had cardiac arrests and 185 died after COVID shots.³⁶ Many more reports have been published since then. Medical news outlets continue to downplay post-jab myocarditis, despite reports from various groups like the US military and Israel. A closer look at the military JAMA article shows that only 23 patients were studied.³⁷

Why? Because those were the only cases in the VAERS reporting system, widely known to have vast underreporting. Yet in a 23-patient study, researchers make a definitive claim that myocarditis is rare and nothing to really worry about.

MSM and the CDC keep telling us adverse events and myocarditis following mRNA-based Covid-19 vaccines is “rare”. However, we must pause to consider that 1,226,314 reports of adverse events following COVID vaccines were submitted between Dec. 14, 2020, and April 8, 2022, to the Vaccine Adverse Event Reporting System of the CDC. The data included a total of 26,976 reports of deaths and 219,865 serious injuries. Excluding “foreign reports” to VAERS, 805,921 adverse events, including 12,471 deaths and 79,811 serious injuries, were reported in the U.S. between Dec. 14, 2020, and April 8, 2022. Those figures continue to exponentially increase, and many involve children!

Bottom line - As with any increased risk, there should always be a choice.
